The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/590,292	Applicant(s) KIKUCHI, YOSHIAKI	
	Examiner Jeffrey J. Restifo	Art Unit 3618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 April 2009.

DETAILED ACTION

Election/Restrictions

1. Applicant's election of species A in the reply filed on 4/3/09 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claim 7 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species C, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/3/09.
3. Examiner note: The "pair-rotor motor" arrangement appears to be shown in figure 9 and therefore has been withdrawn by the examiner.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuroda et al. (US 6,352,489 B1).
6. Kuroda et al. discloses a hybrid vehicle comprising engine E, motor/generator M, an electric power-mechanical power input/output or trans T, wheel axle Wf, an accumulator unit or battery BAT, drive power demand setting module (not numbered,

Art Unit: 3618

inherent and performed by driver), vehicle speed measurement module (not numbered), lower rotation speed limit setting module (not numbered), and control module 3, wherein said modules determine vehicle speed and set upper and lower engine speed limits and controls the engine based on the demand relative to the vehicle speed and engine speed limits, and fuel injection can be stopped to decelerate or brake the vehicle, as shown in figures 1-5 and recited in col. 4-6.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kuroda et al., as applied to claim 1.

Kuroda et al. does not disclose a three shaft power input/output, rotating shaft, and residual shaft. A three shaft power output transmission is well-known in the art of vehicles and has been given little patentable weight unless it produces an unexpected result and therefore it would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the hybrid vehicle of Kuroda et al. with the conventional three shaft transmission in order to transmit power from the engine and motors to the axles.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey J. Restifo whose telephone number is (571) 272-6697. The examiner can normally be reached on M-F 10-7.
